SUMMARY

Software Engineer and MSc Computer Science graduate with an unconventional path into tech, transitioning from International Relations after developing a strong passion for software engineering. Experienced building full-stack applications, backend services, data pipelines, and cloud infrastructure through industry experience and personal projects. Brings a combination of technical problem-solving, communication, and stakeholder management skills. Eligible to work in the UK with a valid work permit.

EDUCATION

MSc in Computer Science | University of Birmingham | Sep 2024 – Sep 2025

BA in International Relations | Bilkent University | Sep 2018 – Sep 2024

EXPERIENCE

Software Engineer – Draftwise | Remote, New York, USA | May 2024 – Sep 2024

- Built Python data pipelines integrating the HubSpot and DocuSign APIs, using AWS S3 for automated data processing and storage.
- Developed React and TypeScript dashboard features, implementing PostgreSQL constraints to improve data integrity and prevent duplicate records.
- Investigated and resolved production issues through L3 engineering support, performing root cause analysis and collaborating with other developers to deploy backend fixes in Python.
- Wrote technical documentation and contributed to onboarding sessions to help enterprise customers successfully integrate and adopt the platform.
- Worked with customer-facing teams and PM to scope technical integrations and build internal dashboards to improve visibility into customer activity and product usage.

Research Assistant Data Analyst – Bilkent University | Ankara, Turkey | Sep 2022 – Jun 2023

- Built simulation models in AnyLogic across 3 international logistics scenarios, identifying process bottlenecks and operational inefficiencies.
- Utilized Python and SQL to analyze logistics datasets of 1,000+ records, translating raw data into actionable cost-reduction strategies.
- Delivered 2 technical presentations and walkthroughs of optimization models to academic, industrial, and external project stakeholders to drive alignment.

International Relations Intern – Ministry of Foreign Affairs of Turkey | Ankara, Turkey | Jun 2022 – Jul 2022

- Developed an internal web platform using HTML, CSS, and basic JavaScript, improving accessibility to 50+ departmental resources for a 5+ person team.
- Analyzed 50+ daily geopolitical news sources to synthesize reporting for senior officials, translating high-volume data into concise executive summaries.

PROJECTS

Crisis Logistics Command System | Freelance Project | <https://github.com/alpatamerr/crisis-logistics-command-system>

Tech Stack: React, TypeScript, Python, Polars, PySpark, Palantir Foundry OSDK, Leaflet, BlueprintJS

- Designed 21 Python/PySpark data pipelines integrating 4 real-time APIs (TfL, Google Maps, Airlabs, Air Quality) with automated 15-minute refresh cycles.
- Built an operational dashboard with 5 interactive tabs featuring live incident mapping, transport monitoring, resource CRUD actions, and PySpark-powered analytics.
- Architected a semantic data model (13 entity types) with server-side business logic, automated threshold alerts, and full CRUD operations via TypeScript Functions.

AI-Personalized Running Coach | MSc Dissertation Project | <https://github.com/alpatamerr/ai-personalized-running-coach>

Tech Stack: React, Python, Node.js, Express.js, PostgreSQL, Strava API, OpenAI API

- Developed a full-stack application integrating the Strava API to ingest, parse, and store 500+ activity records and performance data points.
- Implemented K-means clustering in Python across 3 performance metrics (cadence, pace, heart rate) to generate adaptive training recommendations.
- Integrated the OpenAI API to deliver contextual, natural language coaching insights through a responsive React interface.

SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL, Bash
- **Frameworks & Libraries:** FastAPI, PySpark, Polars, React, Node.js, Express.js, Leaflet, BlueprintJS
- **Cloud & Tools:** AWS (S3, RDS), Docker, Claude Code, Palantir Foundry, CI/CD, PostgreSQL, SQLite
- **API & Data:** REST APIs, JSON Schemas, Webhooks, Data Pipelines, HubSpot API, DocuSign API, Strava API, OpenAI API

ACTIVITIES & CERTIFICATIONS

- Codecademy Full-Stack Engineer Certificate | Aug 2024
- Participated in security-focused hackathons and technical workshops at the University of Birmingham.
- Coordinated international conferences as an Event Organizer at Bilkent University, leading a team of 5 to manage live event logistics, speaker relations, and direct attendee communication.
- Languages: English (Full Professional Proficiency) | Turkish (Native).
