Portfolio: alpatamer.dev | [LinkedIn](#) | [GitHub](#)

SUMMARY

MSc Computer Science graduate and Software Engineer with a professional background in architecting scalable, data-driven applications. Technically proficient in building automated Python pipelines and high-performance RESTful APIs using FastAPI, with a proven track record of optimizing backend systems and data reliability at Draftwise. Experienced in managing cloud-native infrastructure with AWS (S3, RDS) and the modern SDLC using Docker and GitHub Actions. A strategic technical bridge focused on translating complex business requirements and KPIs into clean, maintainable engineering solutions. Eligible to work in the UK with a valid work permit.

EDUCATION

MSc Computer Science – University of Birmingham Sep 2024 – Sep 2025
BA International Relations – Bilkent University Sep 2018 – Aug 2024

EXPERIENCE

Software Engineer – Draftwise May 2024 – Sep 2024
Remote, New York, USA

- Acted as a technical bridge between product, engineering, and business teams to translate requirements into dashboards that improved stakeholder visibility into sales pipeline KPIs
- Engineered Python-based data pipelines to extract and clean HubSpot and DocuSign data, utilizing AWS S3 for scalable object storage to ensure high data availability
- Developed TypeScript-based React dashboard components enabling account managers to monitor and act on real-time contract and pipeline data
- Implemented automated validation logic in Python and PostgreSQL constraints to identify document errors and prevent duplicate entries, ensuring high data integrity
- Optimized frontend performance using lazy loading and memoization, enhancing usability and reducing page load times

Research Assistant Computational Logistics & Data Analysis – Bilkent University Sep 2022 – Jun 2023
Ankara, Turkey

- Built simulation models in AnyLogic to analyze and optimize international logistics scenarios, identifying cost-reduction opportunities
- Utilized Python to perform statistical analysis on logistics datasets, identifying bottlenecks and optimizing supply chain workflows for enhanced operational efficiency
- Presented technical findings and optimization recommendations to academic and project stakeholders

International Relations Specialist Intern – Ministry of Foreign Affairs of Turkey Jun 2022 – Jul 2022
Ankara, Turkey

- Developed an internal website using HTML, CSS, and basic JavaScript, improving accessibility to key resources
- Analyzed geopolitical news datasets to synthesize daily reporting for senior officials, translating high-volume data into concise strategic summaries

PROJECTS

Simple Social | Personal Project 2026
[Project Link](#)

FastAPI, Python, Streamlit, SQLite, JWT, ImageKit CDN

- Engineered a full-stack web application utilizing a FastAPI backend and Streamlit frontend, featuring async SQLite database management, secure JWT authentication, and seamless real-time data feeds
- Integrated ImageKit CDN to optimize media storage and handle dynamic image transformations for robust user upload workflows

AI-Personalized Running Coach | MSc Dissertation Project 2025
[Project Link](#)

React, Python, Node.js, Express.js, PostgreSQL, REST APIs

- Developed a full-stack application integrating the Strava API to manage run history and personalized training plans
- Implemented machine learning (K-means clustering) to generate adaptive user-specific training recommendations
- Integrated OpenAI GPT to deliver contextual coaching insights through a responsive interface

Weather Tracker | Personal Project 2025
[Project Link](#)

React, Flask, Node.js, Python, APIs

- Developed a Python application integrating OpenWeatherMap API to collect, transform, and report real-time forecasting data across multiple locations for comparative analysis

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Bash
Frameworks & Libraries: React, Next.js, Node.js, FastAPI, Flask, Redux, Streamlit
Infrastructure & Tools: AWS (S3, RDS), PostgreSQL, Docker, Git, GitHub Actions, CI/CD

ACTIVITIES & CERTIFICATIONS

- Participated in security-focused hackathons and workshops at University of Birmingham
- Led a team of 5 as Event Organizer at Bilkent University, coordinating international conferences
- Codecademy Full-Stack Engineer Certificate (Aug 2024)

LANGUAGES

- English (Full Professional Proficiency) | Turkish (Native)
